SUBJECT INDEX TO VOLUME 27

Combined convection between vertical parallel plates, 417
Convection from cylinders within confining walls, 487
Convection in vertical semicircular ducts, 359
Convection in turbulent pipe flows, 179
  Velocity profile and turbulent eddy viscosity, 183
Convection from horizontal tube banks, 473
Convection in a trapezoidal enclosure, 451
Convection near the density extremum, 433
Convection of air in an inclined cubic cavity, 681
Convection in a partially closed vertical channel, 579
Convection around heated cylinders inside a cavity, 335
Cylinder moving in channel flow, 373

Direct diffusion in low Prandtl number liquids, 639
Droplet arrays near vertical hot plate, 211
Droplet steam vaporization, 273

Effect of heater and cooler locations in square cavities, 351
Effect of stagnant conductivity in horizontal channels, 195
Evaporating spray in turbulent gas flow, 143

Fire propagation in complex topography, 229
  Fire spread model, 238
Flame stabilization over a single droplet, 53
Flow between disks with radial throughflow, 537
Flow from impinging slot jets, 35

Gas tungsten arc welding process, 499

Heat transfer in rectangular channels, 19
Heat conduction with internal heating, 611
Heat transfer in reciprocating engine, 255
High-energy laser-cutting process, 717
Hydromagnetic convection in a porous enclosure, 107
  Vertical system, 114
  Horizontal system, 120

Mixed convection in horizontal channels, 461

Natural convection in eccentric annuli, 89
Natural convection in a square enclosure, 319
  Effect of the position of the heating element, 327
  Effect of heating element size, 328
Natural convection in a stairwell, 1
Natural convection from a buried pipe with external baffles, 595
Natural convection in open cavities and slots, 705
Non-Darcian heat transfer through porous media, 651

Oscillatory natural convection of fluid, 307

Pattern selection for Rayleigh-Bénard convection, 621
Phase change with the mushy zone, 163
Polarization effects in Monte Carlo simulations, 129

Radiative enhancement through particle seeding, 665

Thermovibrational convection in rectangular cavities, 297
Three-dimensional thermocapillary convection, 73
Transient solidification in an enclosed region, 519
Transition in mixed-convection channel flows, 559
Two-dimensional solid-gas combustion, 395
